Get compliant today with a Blanc Industries Photo Nutrition Sign Set

On January 1, 2008, the FDA set a regulation that Trans Fat will now be required to be listed on a separate line on the food label under the Saturated Fat line. Blanc Industries has the nutrition fact signs that will keep you in compliance while increasing customer awareness about nutritional value with bold and colorful display signs. Each kit includes nutritional information on the most commonly consumed fresh meat and seafood items available in supermarkets. With the size of 7.75" x 10", these signs conveniently fit into most track signing systems.
